

Great Basin Priority Summary - Based on Most Recent 209's
9/01/2020

[illegible]

Evening Brief

Date: Tuesday September 1st, 2020

Weather Summary

*****Near Record Heat by the late in the week thru the rest of the 7-Day Period *****

A strong high-pressure system in place over southern Ca will build over the western Great Basin on Wednesday/Thursday the spread north and eastward, covering the entire region in hot and dry conditions for the latter part of the week through the weekend. Temperatures could approach record levels across parts of Nevada and southwest Idaho. However, no significant lightning or wind threats are expected during this time.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 5	New Fires and Acres: 11 fires for 3.7 acres. 2,500 Large fire acre growth.

Fuels/Fire Potential

*****A Fuel and Fire Behavior Advisory is in Effect for Eastern Nevada, Most of Utah and the Western Arizona Strip *****

Fuels are most critically dry across southern Idaho, Utah and eastern Nevada. Other areas, such as the mountains of Central Idaho and Western Wyoming, as well as western Nevada, have had recent precipitation and cooler conditions but will quickly dry and become critical by the weekend.

In the lower elevations, grasses are fully cured, and sagebrush live fuel moisture is ranging from 60-100% in most areas, correlating with extreme fire behavior.

Resources:

Aviation within the Great Basin

- o 1 VLAT, 3 LATs, 2 CL-215, 2 CL-415
- o 26 SEATs, 11 AA, 2 ASM
- o 9 Type 1 Helicopters / 7 Comm.
- o 10 Type 2 Helicopters / 5 Comm.
- o 20 Type 3 Helicopters / 5 Comm.

Crews Committed within the Great Basin

- o 10 IHCs / 1 Available
- o 15 Type 21A / 0 Available
